CCNA 200-301

Cisco Certified Network Associate-CCNA(200-301) is a certification program from Cisco a world famous networking, Cloud, Cybersecurity solutions providers. CCNA is one of the most in-demand program in networking around the world.

After this course candidate can handle advanced networks easily. We will start from Fundamentals of networking, Subnetting, OSI-model, IP services, & concepts related to automation, etc. You will also get guidance about security protocols and fundamentals that are necessary for maintaining the integrity of systems in the network.

After completing this course, you can work as an entry-level network engineer, network support technician, help desk technician, or network administrator. The course makes you adept in the fundamentals that are essential to pursue a career in the IT field.

Curriculum

Domain 1: Network Fundamentals
Domain 2: Network Access
Domain 3: IP Connectivity
Domain 4: IP Services
Domain 5: Security Fundamentals
Domain 6: Automation and Programmability

Scope: CCNA is considered the standard for working and managing system requirements in IT. It makes you capable of handling networking challenges, and issues that may arise while managing networks in an organization. Therefore, students who wish to pursue a career in this domain, should take it up as an entry-level course.
